This month's Digital Risk Report covers a range of timely and important topics impacting organizations today. We take a closer look at Texas' recent lawsuit involving WhatsApp and the implications for privacy and digital communications; examine the growing trend of states enacting new employment laws, including Connecticut's latest updates; and provide insight into the evolving regulatory landscape with a piece on OCR.

Our coverage includes an analysis of the Federal Wiretap Act and how it is increasingly being used as a tool in litigation, as well as a discussion of the recent pause by Anthropic on its AI development and what that means for the industry. You'll also find articles on the risks posed by AI agents, unique vulnerabilities identified in Claude, and the collection of information in the automotive industry, with a focus on the FTC's actions involving General Motors and OnStar.

We hope you find this edition informative and helpful as you navigate the rapidly changing world of digital risk.

Insights in the June 2026 issue include:

- AI is Already in Your Organization – Your Acceptable Use Policy Can't Wait
- When a Car Becomes a Data Broker: Why the Federal Trade Commission's General Motors/OnStar Order Matters
- When Your SaaS Vendor Becomes an AI Company Overnight
- Anthropic's Call for a Global AI Pause: What Businesses Need to Know About the Governance Landscape
- Texas v. Meta and WhatsApp: A New Front in the Battle Over Encryption, Privacy Marketing, and Consumer Protection
- Why Your Next "Urgent Call from the CEO" Might Be Synthetic and What to Do About It
- Legislative Updates
- Regulatory Updates
- Notable Data Breaches
