As the world adjusts to work-from-home, cybersecurity becomes more crucial for organizations. The Office of Civil Rights (OCR) has circulated information from the Cybersecurity and Infrastructure Security Agency (CISA) at the U.S. Department of Homeland Security. The alert provides information on the top 10 Common Vulnerabilities and Exposures (CVE) relating to IT systems. These CVEs relate to a number of commonly used systems. This alert details CVEs from 2016 through 2020. Additionally, the alert proposes fixes for each vulnerability. The details can be found at https://www.us-cert.gov/ncas/alerts/aa20-133a. The webpage also references free services available through CISA.
