Tampa attorneys Jaide Beverly and Jessica West presented "Stay Compliant with Healthcare Vendor and Supplier Contracts," via webinar for Lorman on November 5, 2019. Healthcare organizations manage many relationships in their day-to-day business including vendors and suppliers and require coordination of many people and organizations to provide quality and compliant care, products and/or services. Since vendors and suppliers can be a huge source of liability, it is important for healthcare organizations to develop strategies to further protect the organization when dealing with vendors and suppliers, including pre-contract diligence and understand how to effectively manage risks in vendor and supplier contract negotiation.

To learn more visit Lorman.
